

CQS Dynamic Credit Multi Asset Fund

Supplement to the Prospectus

for CQS Funds (Ireland) p.l.c.

This Supplement contains specific information in relation to CQS Dynamic Credit Multi Asset Fund (the “**Fund**”), a sub-fund of CQS Funds (Ireland) p.l.c. (the “**Company**”), an umbrella type open-ended investment company with variable capital and segregated liability between sub-funds governed by the laws of Ireland and authorised by the Central Bank as a UCITS pursuant to the Regulations.

This Supplement forms part of and should be read in conjunction with the Prospectus of the Company dated 1 April 2025 (the “Prospectus”).

The Directors of the Company, whose names appear in the **Directors of the Company** section of the Prospectus, accept responsibility for the information contained in the Prospectus and this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) such information is in accordance with the facts and does not omit anything likely to affect the import of such information. The Directors accept responsibility accordingly.

At times the Fund may invest in below investment grade securities, an investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. As distributions may be made out of the capital of the Fund, there is a greater risk that capital will be eroded and income will be achieved by foregoing the potential for future capital growth of your investment and the value of future returns may also be diminished. This cycle may continue until all capital is depleted. Please note that distributions out of capital may have different tax implications to distributions of income and you are recommended to seek advice in this regard. Where dividends are paid out of the capital of the Fund, investors may not receive back the full amount invested. Distributions made during the life of the Fund must be understood as a type of capital reimbursement.

Words and expressions defined in the Prospectus shall, unless the context otherwise requires, have the same meaning when used in this Supplement.

Dated: 1 April 2025

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The investment objective of the Fund is to seek to maximise long-term total returns for Shareholders of the Fund, comprising both income and capital growth (“**total return**”).

There can be no assurance that the Fund will achieve its investment objective or that it will not incur a loss. The investment objective has been established based on market conditions and available investment opportunities existing at the date of this Supplement.

Investment Policy

The Investment Manager will seek to achieve the investment objective on behalf of the Fund by sourcing, constructing, and investing in a portfolio of credit and debt instruments. When constructing the Fund’s portfolio, the Investment Manager will also take into account, in relation to the asset classes and each issuer and/or position, environmental, social, and governance (“**ESG**”) factors, as set out under the heading **Sustainable Finance Disclosures**.

The Fund will make investments in higher yielding debt securities. These debt securities may be fixed or floating rate notes or bonds that are non-investment grade, have varying maturities and may be issued by corporate or financial issuers. The Fund may also invest in fixed or floating rate government debt securities, issued by governments, government agencies, supranational bodies or local authorities, and corporate debt securities, issued by corporate or financial issuers. These debt securities will include deposits, bills, notes, and bonds. The Fund may also invest up to 20 per cent. of the Fund’s Net Asset Value in convertible bonds (excluding contingent convertible instruments (“**Contingent Convertibles**”), which are subject to a separate and distinct limit as further described below) and up to 40 per cent. of its Net Asset Value in asset backed securities, including whole business securitisations, commercial mortgage backed securities, residential mortgage backed securities, collateral loan obligations (“**CLOs**”), and consumer asset backed securities.

Further, the Fund may invest in Contingent Convertibles. Contingent Convertibles are a form of hybrid debt instrument intended to either convert into equity or have their principal partially or completely written off with the option of revaluation under certain circumstances. Such instruments may be senior and/or subordinated. Investment in, or exposure to, Contingent Convertibles will be limited to 20 per cent. of the Fund’s Net Asset Value.

Each of the debt securities listed above may be listed or traded in, or substantially derive their revenues from, either developed or emerging markets (although investments in emerging market securities will be limited to 25 per cent. of the Net Asset Value of the Fund). Such investments may be denominated in any currency. These investment instruments may be fixed or variable in nature, may pay payment-in-kind interest, and may be of any duration. The Fund is permitted to invest in investment grade, as well as non-investment grade securities (as classified by any of Standard & Poor’s, Moody’s or Fitch rating agencies, or an internal rating determined by the Investment Manager).

The Fund may also invest in financial indices using total return swaps (“**TRS**”) or via exchange traded funds (“**ETFs**”) (each as detailed further below) in line with the Fund investment policy. Such indices will be benchmarks for debt securities and credit markets.

The Fund is actively managed by the Investment Manager, using a multi-asset credit investing approach in order to maximise the total return for investors throughout all stages of economic and credit cycles. It does this through:

- *Top down allocation.* Seeking to identify and invest according to the relative value between the credit instruments and debt securities described above in order to profit from opportunities and mitigate risk. In assessing relative value, the Investment Manager takes into consideration how various sectors of the credit markets react differently to changes in fundamentals, supply and demand dynamics, and regulation. As such, relative allocations to each credit asset class may vary during each interest rate or credit cycle.
- *Bottom up security selection.* Investments are selected through fundamental research and assessment of borrowers, taking into consideration factors such as credit quality, environmental, social and governance factors, investment maturity, issuer type, liquidity, and geographical and sectoral exposure. The Investment Manager will select debt securities exhibiting characteristics, which indicate a strong likelihood that the relevant issuer will repay their borrowings over the term of the Fund’s investment.

The Fund may use FDIs for hedging, efficient portfolio management, and investment purposes. The Fund may use currency swaps, foreign exchange forwards, currency options, currency futures and non-deliverable forwards for currency hedging purposes, and interest rate swaps and bond futures for interest rate hedging purposes. The Fund may hedge market risk and credit risk using credit default swaps (“**CDS**”) and swaptions. The Fund may also take synthetic exposure to the credit asset classes described above using CDS and TRS. The use of these FDIs is described in greater detail in **Financial Derivative Instruments and Techniques** below.

The Fund may also enter into repurchase agreements for efficient portfolio management purposes only (subject to the conditions and limits set out in the UCITS Regulations).

The Fund may only hold up to 20 per cent. of its Net Asset Value in equity securities which have been received as a result of debt securities being restructured or converted. The Fund will not invest in other equity securities, including preference shares or depositary receipts.

The Fund may also gain exposure to the aforementioned instruments by investing, in aggregate, not more than 10 per cent. of the Fund’s Net Asset Value in other collective investment schemes and/or ETFs. Such collective investment schemes or ETFs will be UCITS domiciled and authorised in an EU Member State.

Any investments in transferable securities, money market instruments, and ETFs will be those which are listed or traded on a Market listed in Appendix I of the Prospectus, subject to the general 10 per cent. limit on transferable securities and money market instruments not listed, traded or dealt on a regulated market. Money market instruments may be used for ancillary liquidity purposes and will include commercial paper, floating rate notes or certificates of deposit.

INVESTMENT RESTRICTIONS

The general investment restrictions set out under the heading **Investment Restrictions** in the Prospectus shall apply to the Fund. Further investment restrictions are set out in the section entitled **Investment Policy** above and Annex III of this Supplement (**Securities Financing Transactions Regulation**).

The Directors may from time to time, impose such further investment restrictions as shall be compatible with or in the interests of Shareholders in order to comply with the laws and regulation of the countries where Shareholders are located.

FINANCIAL DERIVATIVE INSTRUMENTS AND TECHNIQUES

Subject to the Regulations and to the conditions and limits stipulated by the Central Bank from time to time, the Fund may invest in certain FDIs dealt on a Market listed in Appendix I of the Prospectus and/or over-the-counter for efficient portfolio management, hedging, and investment purposes. The Company uses a risk management process that enables it to accurately measure, monitor and manage the various risks associated with the FDIs used by it. The Company will provide to Shareholders on request supplementary information relating to the risk management methods employed by the Company, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments.

To the extent that the Fund uses FDIs, it may be leveraged through its use of those FDIs but such leverage will not exceed 100 per cent. of the Fund’s Net Asset Value. The Fund will employ the commitment approach to measure global exposure and to ensure that the Fund’s use of FDIs is within the Central Bank’s limits.

The types of FDI in which the Fund may invest are described below:

Credit Default Swaps

CDS provide a measure of protection against defaults of debt issuers. The Fund’s use of CDS does not assure their use will be effective or will have the desired result. The Fund may at the discretion of the Investment Manager be the buyer and/or seller in CDS transactions. Credit default swaps are transactions under which the parties’ obligations depend on whether credit events have occurred in relation to a reference entity (or certain reference entities making up an index). The categories of credit event are specified in the contract and are intended to identify the occurrence of a significant deterioration in the creditworthiness of the reference asset (or constituents of the relevant index).

The buyer in a CDS contract is obligated to pay the seller a periodic stream of payments over the term of the contract so long as no credit event on an underlying reference entity has occurred. If the Fund is a buyer and

no credit event occurs the Fund's losses will be limited to the periodic stream of payments over the term of the contract. As a seller, the Fund will receive a fixed rate of income throughout the term of the contract, provided that there is no credit event. In the event of credit event relating to a CDS reference entity the seller will typically make a cash settlement payment to the buyer.

The Fund will enter into CDS transactions to hedge against market or credit risk, or to gain synthetic exposure to the underlying reference asset.

Total Return Swaps

A TRS is an agreement between two counterparties to exchange the returns (or differentials in rates of return) earned or realised on particular pre-determined investments or instruments, which may be adjusted for an interest factor. The gross returns to be exchanged or "swapped" between the parties are generally calculated with respect to a "notional amount". A TRS is an over-the-counter derivative and is a bilateral financial contract between a total return payer and a total return receiver; the Fund may be either a total return payer or total return receiver. The total return payer pays the total return of a reference obligation and receives a form of payment from the receiver of the total rate of return. Often payment is a floating rate payment, for example, a spread to a particular interest rate benchmark. While bilateral arrangements of this type allow the Fund greater flexibility to tailor the swap to its needs, OTC swaps generally involve greater risk than exchange-traded derivatives, which are guaranteed by clearing organisations of the exchanges where they are traded.

The Fund may use TRS for efficient portfolio management purposes in order to achieve efficient financing on underlying securities. The Fund may also use TRS to access markets and products which are otherwise unavailable and manage leverage to assist in achieving the Fund's investment objective.

Interest Rate Swaps

An interest rate swap is an agreement negotiated between two parties to exchange recognised interest rate cash flows, calculated on a notional amount, at specified dates during the life of the swap. The notional amount is used only to determine the payments under the swap and is not exchanged. The payment obligation of each party is calculated using a different interest rate, typically with one party paying a floating interest rate in return for receiving a fixed interest rate, either at regular intervals during the life of the swap or at the maturity of the swap.

The Fund will use interest rate swaps to hedge interest rate risk.

Futures and Options

Futures are contracts to buy or sell a standard quantity of a specific asset (or, in some cases, receive or pay cash based on the performance of an underlying asset, instrument or index) at a pre-determined future date and at a price agreed through a transaction undertaken on an exchange. Since these contracts are marked-to-market daily, investors can, by closing out their position, exit from their obligation to buy or sell the underlying assets prior to the contract's delivery date.

The Fund will use futures contracts to hedge against market risk; as an example, the Fund may use bond futures to hedge interest rate risk.

There are two forms of options, put and call options. Put options are contracts sold for a premium that gives one party (the buyer) the right, but not the obligation, to sell to the other party (the seller) of the contract, a specific quantity of a particular product or financial instrument at a specified price. Call options are similar contracts sold for a premium that gives the buyer the right, but not the obligation, to buy from the seller of the option at a specified price. Options may also be cash settled.

The Fund may use currency options for currency hedging purposes, the value of which depends largely upon the price and volatility in the underlying currency in relation to the exercise (or strike) price during the life of the option. Options will also be used to hedge against market risk and volatility.

Swaptions

Swaptions are contracts whereby one party receives a fee in return for agreeing to enter into a forward swap at a pre-determined fixed rate if some contingency event occurs.

The Fund will enter into swaptions on CDS for credit risk hedging purposes.

Forward Foreign Exchange Contracts, Currency Swaps and Non-Deliverable Forwards

A forward contract locks-in the price at which an asset may be purchased or sold on a future date. In currency forward contracts, the contract holders are obligated to buy or sell the currency at a specified price, at a specified quantity and on a specified future date. A currency swap is similar to a currency forward, but has the additional aspect of a linked spot foreign exchange transaction.

A non-deliverable forward is a cash-settled contract on a thinly traded or non-convertible currency. The latter currency is specified against a freely convertible, major currency, and the contract is for a fixed amount of the non-convertible currency, on a specified due date, and at an agreed forward rate. At maturity, the daily reference rate is compared with the agreed forward rate, and the difference must be paid in the convertible currency on the value date.

The Fund may use forward foreign exchange contracts, currency swaps, and non-deliverable forwards for currency hedging purposes and efficient portfolio management.

Foreign Exchange Forwards for Share Class Hedging

The Investment Manager will conduct currency hedging transactions in respect of the Hedged Share Classes (as defined below) using currency swaps (which include a forward foreign exchange contract) in respect of a Hedged Share Class that is not denominated in the Base Currency of the Fund. Any profit or loss attributable to such transactions shall accrue solely to the investors in that Hedged Share Class and the Net Asset Value per Share of that Share Class shall be increased or reduced (as the case may be) by the benefit/cost of any such hedging transactions.

This section is to be read in conjunction with the provisions set out in the Prospectus under the heading **Share Class Hedging**.

Convertible Bonds

Convertible bonds combine aspects of income paying securities and an option on the stock of the issuer. The convertible bond will typically pay a regular coupon or dividend and allow the holder of the convertible bond the right to convert the security into equity of the issuer of the convertible bond. The conversion option may be exercised on a single day only, on a number of specified dates, or over a continuous period of time. Usually a convertible bond will have a specified maturity date on which the issuer will repay the principal amount of the bond if the holder of the bond has not elected to convert. Convertible bonds may have additional features such as the ability of the issuer to call back the convertible bond at a specific price, or the right of the holder to put the convertible bond back to the issuer at a specific price.

Contingent Convertible Securities

Contingent Convertibles are a form of hybrid debt security that are intended to either convert into equity or have their principal partially or completely written off or written off with the option of revaluation under certain circumstances. Contingent Convertibles, like subordinated bonds, serve to absorb the issuer's capital losses before other higher ranking liabilities.

This section is to be read in conjunction with the provisions set out in the Prospectus under the headings **Financial Derivative Instruments**, **Efficient Portfolio Management**, and **Collateral Policy**.

SECURITIES FINANCING TRANSACTIONS

Shareholders should refer to Annex III of this Supplement (**Securities Financing Transactions Regulation**) for information relating to the Fund's use of securities financing transactions (such as repurchase transactions) ("**SFTs**") and TRSs.

SUSTAINABLE FINANCE DISCLOSURES

Pursuant to EU Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector, which is also known as the "Sustainable Finance Disclosure Regulation" (the "**SFDR**"), the Fund is required to disclose information on how it promotes environmental and social characteristics and ensures these commitments are met, the manner in which sustainability risks are integrated into the investment decision making process, and the results of the assessment of the likely impacts of sustainability risks on the returns of the Fund. The investment strategy of the Fund takes into account the promotion of certain environmental and social characteristics as further described in the Annex below. Accordingly, the Investment Manager has

categorised the Fund as meeting the requirements set out in Article 8(1) of the SFDR for products which promote environmental and social characteristics. Shareholders should refer to the Annex to this Supplement for further sustainable finance disclosures.

BENCHMARKS

The Fund is not formally managed to a benchmark. From time to time, the Investment Manager may use an appropriate (as determined in the reasonable discretion of the Investment Manager) benchmark(s) for comparison purposes. Such benchmark(s) may be published or reported alongside the Fund's Net Asset Value and Net Asset Value per Share, or otherwise used by the Investment Manager in marketing materials for the Fund, including for historic performance comparison purposes.

RISK FACTORS

The general risk factors as set out in the Prospectus shall apply. In addition to the risk factors described in the Prospectus, prospective investors should consider the risk factors set out at Annex I of this Supplement (**Additional Risk Factors**).

KEY INFORMATION FOR BUYING AND SELLING

The following Classes of Shares are available for issue in the Fund. Each of the Share Classes not denominated in the Base Currency will be hedged share classes (the "**Hedged Share Classes**"):

Share Class	Classes		Eligibility Criteria
	Non-Distributing Shares	Distributing Shares (together, the "Fund Distributing Classes")	
Class F Shares	Class F AUD Shares Class F CAD Shares Class F EUR Shares* Class F GBP Shares* Class F JPY Shares Class F USD Shares*	Class FD AUD Shares Class FD CAD Shares Class FD EUR Shares Class FD GBP Shares* Class FD JPY Shares Class FD USD Shares	Class F Shares are available to those applicants qualified to invest in the Fund requesting a subscription of GBP 10,000,000 (or the foreign currency equivalent) or more. The Directors will close the Class F Shares to further subscription when the value of aggregate subscriptions into the Class F Shares, measured from 27 February 2023, equals at least GBP 500,000,000 or at such other time as they determine in their discretion.
Class A Shares	Class A AUD Shares Class A CAD Shares Class A EUR Shares* Class A GBP Shares* Class A JPY Shares Class A USD Shares	Class AD AUD Shares Class AD CAD Shares Class AD EUR Shares Class AD GBP Shares Class AD JPY Shares Class AD USD Shares	Class A Shares are available to those applicants qualified to invest in the Fund requesting a subscription of GBP 35,000 (or the foreign currency equivalent) or more.
Class I Shares	Class I AUD Shares Class I CAD Shares Class I EUR Shares* Class I GBP Shares* Class I JPY Shares Class I USD Shares*	Class ID AUD Shares Class ID CAD Shares Class ID EUR Shares Class ID GBP Shares Class ID JPY Shares Class ID USD Shares	Class I Shares are available to those applicants qualified to invest in the Fund requesting a subscription of GBP 1,000,000 (or the foreign currency equivalent) or more.
Class C Shares	Class C AUD Shares Class C CAD Shares Class C EUR Shares Class C GBP Shares Class C JPY Shares Class C USD Shares	Class CD AUD Shares Class CD CAD Shares Class CD EUR Shares Class CD GBP Shares Class CD JPY Shares Class CD USD Shares	Class C Shares are available to those applicants qualified to invest in the Fund requesting a subscription of GBP 10,000,000 (or the foreign currency equivalent) or more.
Class D1 Shares	Class D1 AUD Shares Class D1 CAD Shares Class D1 EUR Shares Class D1 GBP Shares Class D1 JPY Shares Class D1 USD Shares	Class D1D AUD Shares Class D1D CAD Shares Class D1D EUR Shares Class D1D GBP Shares Class D1D JPY Shares Class D1D USD Shares	Class D1 Shares will only be available to such consultant entity as the Directors, in their discretion, determine can invest in Class D1 Shares (the " D1 Consultant ") and those applicants that the Directors, in their discretion, determine to be clients of the D1 Consultant and are otherwise qualified to invest in the Fund, in each case requesting a subscription of GBP 10,000,000 (or the foreign currency equivalent) or more.
Class D2 Shares	Class D2 AUD Shares Class D2 CAD Shares Class D2 EUR Shares	Class D2D AUD Shares Class D2D CAD Shares Class D2D EUR Shares	Class D2 Shares will only be available to such consultant entity as the Directors, in their discretion, determine can invest in Class D2 Shares (the " D2 Consultant ") and those applicants that

	Class D2 GBP Shares Class D2 JPY Shares Class D2 USD Shares	Class D2D GBP Shares Class D2D JPY Shares Class D2D USD Shares	the Directors, in their discretion, determine to be clients of the D2 Consultant and are otherwise qualified to invest in the Fund, in each case requesting a subscription of GBP 10,000,000 (or the foreign currency equivalent) or more.
Class D3 Shares	Class D3 AUD Shares Class D3 CAD Shares Class D3 EUR Shares Class D3 GBP Shares Class D3 JPY Shares Class D3 USD Shares	Class D3D AUD Shares Class D3D CAD Shares Class D3D EUR Shares Class D3D GBP Shares Class D3D JPY Shares Class D3D USD Shares	Class D3 Shares will only be available to such consultant entity as the Directors, in their discretion, determine can invest in Class D3 Shares (the “ D3 Consultant ”) and those applicants that the Directors, in their discretion, determine to be clients of the D3 Consultant and are otherwise qualified to invest in the Fund, in each case requesting a subscription of GBP 10,000,000 (or the foreign currency equivalent) or more.
Class D4 Shares	Class D4 AUD Shares Class D4 CAD Shares Class D4 EUR Shares Class D4 GBP Shares Class D4 JPY Shares Class D4 USD Shares	Class D4D AUD Shares Class D4D CAD Shares Class D4D EUR Shares Class D4D GBP Shares Class D4D JPY Shares Class D4D USD Shares	Class D4 Shares will only be available to such consultant entity as the Directors, in their discretion, determine can invest in Class D4 Shares (the “ D4 Consultant ”) and those applicants that the Directors, in their discretion, determine to be clients of the D4 Consultant and are otherwise qualified to invest in the Fund, in each case requesting a subscription of GBP 10,000,000 (or the foreign currency equivalent) or more.
Class D5 Shares	Class D5 AUD Shares Class D5 CAD Shares Class D5 EUR Shares Class D5 GBP Shares Class D5 JPY Shares Class D5 USD Shares	Class D5D AUD Shares Class D5D CAD Shares Class D5D EUR Shares Class D5D GBP Shares Class D5D JPY Shares Class D5D USD Shares	Class D5 Shares will only be available to such consultant entity as the Directors, in their discretion, determine can invest in Class D5 Shares (the “ D5 Consultant ”) and those applicants that the Directors, in their discretion, determine to be clients of the D5 Consultant and are otherwise qualified to invest in the Fund, in each case requesting a subscription of GBP 10,000,000 (or the foreign currency equivalent) or more.

Class D7 Shares	Class D7 AUD Shares Class D7 CAD Shares Class D7 EUR Shares Class D7 GBP Shares Class D7 JPY Shares	Class D7D AUD Shares Class D7D CAD Shares Class D7D EUR Shares Class D7D GBP Shares Class D7D JPY Shares	Class D7 Shares will only be available to such consultant entity as the Directors, in their discretion, determine can invest in Class D7 Shares (the “ D7 Consultant ”) and those applicants that the Directors, in their discretion, determine to be clients of the D7

	Class D7 USD Shares	Class D7D USD Shares	Consultant and are otherwise qualified to invest in the Fund, in each case requesting a subscription of GBP 10,000,000 (or the foreign currency equivalent) or more.
Class D8 Shares	Class D8 AUD Shares Class D8 CAD Shares Class D8 EUR Shares Class D8 GBP Shares Class D8 JPY Shares Class D8 USD Shares	Class D8D AUD Shares Class D8D CAD Shares Class D8D EUR Shares Class D8D GBP Shares Class D8D JPY Shares Class D8D USD Shares	Class D8 Shares will only be available to such consultant entity as the Directors, in their discretion, determine can invest in Class D8 Shares (the “ D8 Consultant ”) and those applicants that the Directors, in their discretion, determine to be clients of the D8 Consultant and are otherwise qualified to invest in the Fund, in each case requesting a subscription of GBP 10,000,000 (or the foreign currency equivalent) or more.
Class D9 Shares	Class D9 AUD Shares Class D9 CAD Shares Class D9 EUR Shares Class D9 GBP Shares Class D9 JPY Shares Class D9 USD Shares	Class D9D AUD Shares Class D9D CAD Shares Class D9D EUR Shares Class D9D GBP Shares Class D9D JPY Shares Class D9D USD Shares	Class D9 Shares will only be available to such consultant entity as the Directors, in their discretion, determine can invest in Class D9 Shares (the “ D9 Consultant ”) and those applicants that the Directors, in their discretion, determine to be clients of the D9 Consultant and are otherwise qualified to invest in the Fund, in each case requesting a subscription of GBP 10,000,000 (or the foreign currency equivalent) or more.
Class D10 Shares	Class D10 AUD Shares Class D10 CAD Shares Class D10 EUR Shares Class D10 GBP Shares Class D10 JPY Shares Class D10 USD Shares	Class D10D AUD Shares Class D10D CAD Shares Class D10D EUR Shares Class D10D GBP Shares Class D10D JPY Shares Class D10D USD Shares	Class D10 Shares will only be available to such consultant entity as the Directors, in their discretion, determine can invest in Class D10 Shares (the “ D10 Consultant ”) and those applicants that the Directors, in their discretion, determine to be clients of the D10 Consultant and are otherwise qualified to invest in the Fund, in each case requesting a subscription of GBP 10,000,000 (or the foreign currency equivalent) or more.
Class M Shares	Class M AUD Shares Class M CAD Shares Class M EUR Shares Class M GBP Shares* Class M JPY Shares Class M USD Shares*	Class MD AUD Shares Class MD CAD Shares Class MD EUR Shares Class MD GBP Shares Class MD JPY Shares Class MD USD Shares	Class M Shares are available to (or for the beneficial entitlement of) the Directors and members, directors or officers, employees and consultants of the Investment Manager and their connected persons.

For the purposes hereof Class D1 Shares, Class D2 Shares, Class D3 Shares, Class D4 Shares, Class D5 Shares, Class D6 Shares, Class D7 Shares, Class D8 Shares, Class D9 Shares, and Class D10 Shares are collectively defined as the “**Class D Shares**”.

Initial Offer Period

The Initial Offer Period for those Classes of Share not marked with an asterisk (*) in the table above shall open at 9:00 a.m. (Dublin time) on the Business Day following the date of this Supplement and will close at 5:00 p.m. (Dublin time) on 1 October 2025 unless extended or shortened by the Directors. Any such extensions will be notified to the Central Bank.

Initial Offer Price

During the Initial Offer Period, Shares may be subscribed for at an Initial Offer Price of 100 units of the currency of the relevant Share Class, except for any JPY denominated Shares which may be subscribed for at an Initial Offer Price of JPY 10,000 per Share.

Subsequent Subscriptions

Following the close of the relevant Initial Offer Period, Shares will be available for subscription at the Subscription Price on each Dealing Day as set out under the heading **Subsequent Subscriptions** in the Prospectus and subject to the relevant terms of this Supplement.

Availability of Shares

Shares will be available for subscription until the Directors resolve to close any Class of Shares to new subscriptions.

Minimum Investments and Shareholding

Share Classes	Minimum Initial Investment Amount (or its currency equivalent)	Minimum Additional Investment Amount (or its currency equivalent)	Minimum Shareholding (or its currency equivalent)
Class F Shares	GBP 10,000,000	GBP 10,000	GBP 10,000,000
Class A Shares	GBP 35,000	GBP 10,000	GBP 35,000
Class I Shares	GBP 1,000,000	GBP 10,000	GBP 1,000,000
Class C Shares	GBP 10,000,000	GBP 10,000	GBP 10,000,000
Class D Shares	GBP 10,000,000	GBP 10,000	GBP 10,000,000
Class M Shares	GBP 0	GBP 0	GBP 0

The Directors, in their absolute discretion, may for each relevant Class of Share waive such Minimum Initial Investment Amount, Minimum Additional Investment Amount, and/or Minimum Shareholding.

Dividend Policy

This section should be read in conjunction with the provisions set out in the Prospectus under the headings **Dividend Policy** and **Taxation**.

The Directors have designated the Fund Distributing Classes as Distributing Shares. Dividends in respect of each Class of Shares will be declared and distributed quarterly each January, April, July, and October at the Directors' discretion. Dividends in respect of each such Class of Shares from time to time will be paid in accordance with the dividend policy adopted by the Directors (and may be paid out of the capital of the Fund where there is insufficient net income or revenue available), broad details of which are set out in the Prospectus. Full details of the Fund's dividend policy in respect of such Distributing Shares are available from the Investment Manager on request. No dividends are currently payable in respect of any other Class of Shares of the Fund.

Base Currency

The Base Currency of the Fund is GBP.

Minimum Fund Size

There is no Minimum Fund Size applicable to this Fund.

Business Day

Any day, other than a Saturday or a Sunday, on which banks are generally open for business in Dublin, New York, and London and/or such other place or such other day(s) as the Directors may determine and notify to Shareholders in advance.

Dealing Day

Unless otherwise determined by the Directors and notified in advance to Shareholders and provided that there is one Dealing Day per fortnight, every Business Day shall be a Dealing Day, except where the determination of the Net Asset Value has been temporarily suspended in the circumstances set out in the Prospectus.

Dealing Deadline

For subscriptions: 1:00 p.m. (Dublin time) on the relevant Dealing Day or such other time, provided it is on or before the relevant Valuation Point as the Directors may, in exceptional circumstances, with the approval of the Depositary, determine and notify to Shareholders in advance.

For redemptions: 1:00 p.m. (Dublin time) on the relevant Dealing Day or such other time, provided it is on or before the relevant Valuation Point as the Directors may, with the approval of the Depositary, determine and notify to Shareholders in advance.

Valuation Point

10:00 p.m. (Dublin time) on the relevant Dealing Day or such other time as the Directors may, with the approval of the Depositary determine, and notify to Shareholders in advance.

Settlement Date

In the case of applications, subscription proceeds must be received in cleared funds by close of business on the third Business Day following the relevant Dealing Day.

In the case of redemptions, redemption proceeds will usually be paid by close of business on the third Business Day following the relevant Dealing Day.

Deferred Redemptions

The Directors may defer redemptions at a particular Dealing Day to the next Dealing Day as set out under the heading **Deferred Redemptions** in the Prospectus.

FEES AND EXPENSES

Class	Annual Investment Management Fee	Performance Fee Rate	Distribution Fee	Capped Fees and Expenses
Class F Shares	0.30 per cent.	N/A	N/A	0.25 per cent.
Class A Shares	1.50 per cent.	N/A	N/A	0.25 per cent.
Class I Shares	0.80 per cent.	N/A	N/A	0.25 per cent.
Class C Shares	0.65 per cent.	N/A	N/A	0.25 per cent.
Class D Shares	See <i>Class D Shares Management Fee</i> below	N/A	N/A	0.25 per cent.
Class M Shares	N/A	N/A	N/A	0.25 per cent.

Investment Management Fee

The Investment Manager will receive from the Company a monthly Investment Management Fee equal to 1/12th of the applicable fee per annum of the Net Asset Value of the relevant Class of Shares as determined by the Directors and notified to the Shareholders of the relevant Class, subject to the Maximum Annual Investment Management Fee set out in the table above (or, in the case of the Class D Shares, as set out below). The Investment Management Fee is calculated (on an actual day count basis) and will accrue as at each Valuation Point and is payable monthly in arrears. There will be no allocation or charge of the Investment Management Fee against the Class M Shares. The Investment Manager may, at its discretion, rebate all or a portion of its Investment Management Fee.

Class D Shares Management Fee

In respect of each class of Class D Shares, the Fund will pay the Investment Manager a monthly Investment Management Fee equal to:

- (a) 1/12th of 0.45 per cent. of that portion of the Net Asset Value of such Class which is equal to or less than GBP 300,000,000; and
- (b) 1/12th of 0.35 per cent. of that portion of the Net Asset Value of such Class in excess of GBP 300,000,000.

Performance Fee

The Fund will not apply a Performance Fee.

Capped Fees and Expenses

The aggregate amount per annum charged as operating, management and administrative fees and expenses, which includes the fees and expenses payable to the Manager, Administrator, Depositary and any sub-custodian as described in more detail in the **Fees and Expenses** section of the Prospectus, in relation to each Class of Shares shall be capped at the applicable rate per annum of the Net Asset Value of the relevant Class of Shares as set out in the table above ("**Capped Fees and Expenses**").

Such Capped Fees and Expenses are calculated and will accrue at each Valuation Point and are payable monthly in arrears. Any such Fees and Expenses that exceed the applicable capped rate set out in the table above shall be borne by the Investment Manager.

Establishment Costs

The cost of establishing the Fund, obtaining approval from the Central Bank, filing fees, the preparation and printing of this Supplement, marketing costs and the fees of all professionals relating to it will be borne by the Fund and amortised over the first three years of the Fund's operation (or such other period as may be determined by the Directors at their discretion) on such terms and in such manner as the Directors may at their discretion determine.

Swing Pricing

The Investment Manager will adopt a swing pricing mechanism in respect of the Fund when net subscriptions, Inter-Fund Exchanges and redemptions of Shares ("**Dealings**") exceed the Swing Threshold determined by the Investment Manager in respect of the Fund. The maximum impact of the swing pricing mechanism on an investor will not exceed 2 per cent. of the Net Asset Value of the Fund (before deduction of the transaction costs incurred by the Fund as a result of Dealings).

This section should be read in conjunction with the provisions set out in the Prospectus in the sub-section **Swing Pricing** in the section **Dilution** under the heading **Fees and Expenses**.

Distributor Fee

No distributor fees will be payable by the Company in respect of the Fund.

Preliminary Charge

The Fund will not apply a Preliminary Charge.

Redemption Charge

The Fund will not apply a Redemption Charge.

Exchange Charge

The Fund will not apply an Exchange Charge.

Further details of the Fees and Expenses to be borne by the Fund are set out in the Prospectus.

BORROWING

In accordance with the general provisions set out in the Prospectus under the heading **Borrowing Powers**, the Fund may borrow on a temporary basis (including through an overdraft facility) up to 10 per cent. of the Net Asset Value of the Fund.

TAXATION

Share Classes of the Fund may be certified as UK reporting funds. Share Classes that have been certified as UK reporting funds will be listed in HM Revenue and Custom's published list of reporting funds which can be found at <https://www.gov.uk/government/publications/offshore-funds-list-of-reporting-funds>.

This section should be read in conjunction with the provisions set out in the Prospectus under the sub-section **United Kingdom Taxation** under heading **Taxation**.

PROFILE OF A TYPICAL INVESTOR

The Fund is considered suitable for investors looking to maximise their total return through a portfolio of assets which generate both income and capital growth. Such investors may wish to have exposure to a portfolio of assets which provide diversification across fixed income and credit markets, while maintaining the ability to follow a high conviction investment approach, which may at times lead to periods of volatility. As such, the typical investor will understand and will be able to accept that the value of the Fund may rise and fall more frequently, and to a greater extent, than other investment types. Such investor will typically have an investment horizon over the long term.

MISCELLANEOUS

There are two other sub-funds of the Company in existence as at the date of this Supplement: CQS Global Convertible Fund and Salar Fund.

INFORMATION REQUIRED, TO THE EXTENT APPLICABLE, FOR DISTRIBUTION OF FOREIGN COLLECTIVE INVESTMENT SCHEMES TO QUALIFIED INVESTORS IN SWITZERLAND:

THE REPRESENTATIVE IN SWITZERLAND IS ACOLIN FUND SERVICES AG (THE "**REPRESENTATIVE**") MAINTOWER, THURGAUERSTRASSE 36/38, CH-8050, ZURICH, SWITZERLAND. THE PAYING AGENT IN SWITZERLAND IS BANQUE CANTONALE DE GENÈVE, 17, QUAI DE L'ILE, 1204 GENEVA, SWITZERLAND. THIS SUPPLEMENT, THE COMPANY'S PROSPECTUS, THE ARTICLES AND ALL OTHER DOCUMENTS USED FOR MARKETING PURPOSES, INCLUDING THE ANNUAL AND SEMI-ANNUAL REPORT, IF ANY, CAN BE OBTAINED FREE OF CHARGE FROM THE REPRESENTATIVE IN SWITZERLAND. THE PLACE OF PERFORMANCE AND JURISDICTION IS THE REGISTERED OFFICE OF THE REPRESENTATIVE IN SWITZERLAND WITH REGARDS TO THE SHARES DISTRIBUTED IN AND FROM SWITZERLAND. THE INVESTMENT MANAGER (AS THE DISTRIBUTOR IN SWITZERLAND) AND ITS AGENTS DO NOT PAY ANY RETROCESSIONS TO THIRD PARTIES IN RELATION TO THE DISTRIBUTION OF THE SHARES OF THE FUND IN OR FROM SWITZERLAND. THE INVESTMENT MANAGER (AS THE DISTRIBUTOR IN SWITZERLAND) AND ITS AGENTS DO NOT PAY ANY REBATES AIMING AT REDUCING FEES AND EXPENSES PAID BY THE FUND AND INCURRED BY THE INVESTORS.

Annex I

Additional Risk Factors

The general risk factors as set out in the Prospectus shall apply. In addition to the risk factors described in the Prospectus, prospective investors should consider the risk factors set out at this Annex I.

General Risk Factors

High Yield and Sub-Investment Grade Debt Securities Risk

High yield debt securities are debt securities with a lower credit rating than investment grade debt securities (and may be unrated). High yield debt securities are subject to greater risk of loss of income and principal due to default by the issuer than are investment grade debt securities. High yield debt securities might also be more illiquid in nature and/or harder to value than investment grade debt securities.

CLOs

The CLO securities which the Fund may invest in may constitute a subordinated tranche of a CLO and payments of principal and interest on such CLO securities may be subordinated to more senior tranches. Interest and principal payments are not fixed but are based on residual amounts available to make such payments. As a result, payments on CLO securities will be made by the CLO to the extent of available funds. CLO securities are a limited recourse obligation and amounts payable on CLO securities are payable solely from amounts received in respect of the collateral of the CLO. If distributions are insufficient to make payments of principal and interest on the CLO, no other assets of the CLO will be available for payment of the deficiency and following realisation of the collateral and the application of the proceeds thereof, the obligations of the CLO to pay such deficiency shall be extinguished. The secondary market for CLO securities may be less liquid and, as a result, the Fund may have to hold such CLO securities for a longer period of time or until their early redemption date or maturity date.

Credit Risk

The ability, or perceived ability, of an issuer of a debt security to make timely payments of interest and principal on the security will affect the value of the security. It is possible that the ability of the issuer to meet its obligations will decline substantially during the period when the Fund owns securities of that issuer (or holds FDIs referencing such securities), or that the issuer will default on its obligations. An actual or perceived deterioration in the ability of an issuer to meet its obligations will likely have an adverse effect on the value of the issuer's securities or any associated FDI. If a security has been rated by more than one nationally recognised ratings agency, the Investment Manager may consider the highest rating for the purposes of determining whether the security is investment grade. The Fund may continue to hold a security, or FDI referencing a relevant security, despite the rating of the relevant security falling below investment grade. The Fund may invest in securities which have not been rated by a nationally recognised statistical rating organisation. Credit rating agencies base their ratings largely on the issuer's historical financial condition and the rating agencies' investment analysis at the time of rating. The rating assigned to any particular investment does not necessarily reflect the issuer's current financial condition, and does not reflect an assessment of an investment's volatility and liquidity. Although investment grade investments generally have lower credit risk than sub-investment grade securities, they may share some of the risks of lower-rated investments, including the possibility that the issuers may be unable to make timely payments of interest and principal and thus default.

Contingent Convertible Risk

The Fund will invest in Contingent Convertibles, and other subordinated debt securities. Contingent Convertibles are a form of hybrid debt security that are intended to either convert into equity or have their principal written down upon the occurrence of certain triggers. These triggers include but are not limited to: (i) an issuer failing to meet a specified minimum capital level; (ii) an issuer's regulator questioning the continued validity of the issuer as a going concern; (iii) an issuer's regulator stating that the security should be converted or written down, partially or wholly; (iv) an issuer receiving specified levels of extraordinary public support. Contingent Convertibles may also have unique equity conversion, principal write-down or coupon cancellation features which are tailored to the issuing banking institution and its regulatory requirements. In the case such triggers or features are invoked, the Fund may lose some or all of its original investment. Investors in Contingent Convertibles may experience a reduced income rate, and the Fund may lose some or all of its original investment. Any future regulatory change impacting European banking institutions or Contingent Convertibles could have substantial and adverse effects on the financial institutions issuing the Contingent Convertibles, or

the ability of the Fund or other investors to invest in Contingent Convertibles. Some specific additional risks associated with Contingent Convertibles are Coupon Cancellation Risk, Loss Absorption Risk, Subordinated Debt Risk, and Trigger Level Risk as set out further below.

Coupon Cancellation Risk. Coupon payments on some Contingent Convertibles are entirely discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time. The discretionary cancellation of payments is not an event of default and there are no possibilities to require re-instatement of coupon payments or payment of any passed missed payments. Coupon payments may also be subject to approval by the issuer's regulator and may be suspended in the event there are insufficient distributable reserves. As a result of uncertainty surrounding coupon payments, Contingent Convertibles may be volatile and their price may decline rapidly in the event that coupon payments are suspended.

Loss Absorption Risk. Contingent Convertibles features have been designed to meet specific regulatory requirements imposed on banking institutions. In particular, Contingent Convertibles can be converted into equity of the issuing banking institution or have their principal written down if their regulatory capital ratio falls below a pre-determined level or when the relevant regulatory authority deems the banking institution being non-viable. In addition, those hybrid debt instruments have no stated maturity and fully discretionary coupons. This means coupons can potentially be cancelled at the banking institution's discretion or at the request of the relevant regulatory authority in order to help the bank absorb losses.

Subordinated Debt Risk. Contingent Convertibles will, in the majority of circumstances, be issued in the form of subordinated debt instruments in order to provide the appropriate regulatory capital treatment prior to a conversion. Accordingly, in the event of liquidation, dissolution or winding-up of an issuer prior to a conversion having occurred, the rights and claims of the holders of the Contingent Convertibles, such as the Fund, against the issuer in respect of or arising under the terms of the Contingent Convertibles shall generally rank junior to the claims of all holders of unsubordinated obligations of the issuer. In addition, if the Contingent Convertibles are converted into the issuer's underlying equity securities following a conversion event, each holder will be subordinated due to their conversion from being the holder of a debt instrument to being the holder of an equity instrument. Any loss incurred by the subordinated securities is likely to be proportionately greater than unsubordinated securities, and any recovery of interest or principal may take more time. As a result, even a perceived decline in creditworthiness of the issuer is likely to have a greater impact on these securities.

Trigger Level Risk. Trigger levels differ and determine exposure to conversion risk. It might be difficult where the Fund is invested in Contingent Convertibles to anticipate the trigger events that would require the debt to convert into equity or the write down to zero of principal investment and/or accrued interest. Trigger events may include: (i) a reduction in the issuing bank's Core Tier 1/ Common Equity Tier 1 (CT1/CET1) ratio or other ratios; (ii) a regulatory authority, at any time, making a subjective determination that an institution is "non-viable", i.e. a determination that the issuing bank requires public sector support in order to prevent the issuer from becoming insolvent, bankrupt or otherwise carry on its business and requiring or causing the conversion of the Contingent Convertibles into equity or write down, in circumstances that are beyond the control of the issuer; or (iii) a national authority deciding to inject capital.

Currency Exposure

The Base Currency of the Fund is GBP. Certain of the Fund's assets may be denominated in currencies other than the Base Currency of the Fund. The Investment Manager may not hedge the currency exposure of certain assets of the Fund.

Interest Rate and Call Risk

The values of bonds and other debt securities are usually affected by changes in interest rates. Declining interest rates generally increase the values of such debt securities, and rising interest rates generally decrease the value of such debt securities. Interest rate risk is generally greater for investments with long durations or maturities.

During periods of falling interest rates, issuers of callable debt securities may call (repay) securities with higher coupons or interest rates before their maturity dates. In such circumstances, the Fund would not benefit from any price appreciation above the such debt security's call price and might have to reinvest the unanticipated proceeds at lower interest rates, resulting in a decline in the Fund's income.

Share Class Hedging Risk

In order to mitigate against the risk of movements in the currency of a Share Class not denominated in the Base Currency (a "**Non-Base Currency Share Class**") against the currency of the portfolio constituents (where they

are different to that of the relevant Non-Base Currency Share Class), the Investment Manager may conduct currency hedging transactions. No assurance can be given that such hedging activities will be entirely effective in achieving the purpose for which they have been entered into. While currency hedging reduces risks and losses in adverse market circumstances, it can also reduce and may completely offset gains in market circumstances that would otherwise have been beneficial had the position not been hedged. Consequently, the performance of a Non-Base Currency Share Class may differ from that of the Fund as a result of the foreign exchange hedging transactions.

Emerging Markets

When trading in emerging markets, the Fund may be subject to risks, such as inadequate investor protection, contradictory legislation, incomplete, unclear and changing laws, ignorance or breaches of regulations on the part of other market participants, lack of established or effective avenues for legal redress, lack of standard practices (including accounting standards or otherwise) and confidentiality customs characteristic of developed markets and lack of enforcement of existing laws and regulations, which may have an adverse effect on the Fund.

Epidemics and Pandemics

Many countries have been susceptible to epidemics and/or pandemics, such as severe acute respiratory syndrome, avian flu, H1N1/09 flu and COVID-19 (commonly known as the “**Coronavirus**”). The epidemic or pandemic outbreak of an infectious disease in a country or region of the world or globally, together with any resulting restrictions on travel, transportation or production of goods or quarantines imposed, could have a negative impact on the national, regional or global economy and business activity in any of the countries in which the Fund may invest and thereby adversely affect the performance of the Fund. While the economic impact of the global outbreak of the Coronavirus is presently uncertain, such outbreak and any future outbreak of an infectious disease or any other serious public health concern in a country, region or globally could materially harm the Fund’s investments and/or restrict the ability of the Fund to acquire, sell, or liquidate investments at favourable times and/or prices, restrict the Fund’s investment and trading activities, and generally impede the Fund’s ability to achieve its investment objective.

In addition, a serious outbreak of infectious disease may also be a force majeure event under contracts that the Company has entered into with counterparties thereby relieving a counterparty of the timely performance of the services such counterparties have contracted to provide to the Fund (the nature of the services will vary depending on the agreement in question). In a worst case scenario, this may result in the Company being delayed in calculating the Fund’s Net Asset Value, processing dealing in Shares, undertaking independent valuations of the Fund or processing trades in respect of the Fund.

Sustainability Risks

Sustainability risks may arise in respect of an issuer itself, its affiliates or in its supply chain and/or apply to a particular economic sector, geographical or political region. Environmental sustainability risks, and in particular physical risks arising from climate change, are associated with events or conditions affecting the natural environment including increasing erratic and potentially catastrophic weather events such as droughts, wildfires, flooding and heavy precipitations, heat/coldwaves, landslides, storms, flooding, erosion and water stress. Environmental risks can also include Carbon emissions risks with many economic sectors, regions and/or jurisdictions currently or in the future subject to transition risks relating to a greener, lower carbon and less polluting economic model. Sectors, regions, businesses and technologies which are carbon-intensive, higher polluting or are otherwise not environmentally sustainable may suffer from a significant fall in demand and/or obsolescence, resulting in stranded assets the value of which is significantly reduced or entirely lost. Social risks may be internal or external to an issuer and are associated with employees, local communities, customers or populations of companies or countries and regions. Governance risks are associated with the quality, effectiveness and process for the oversight of day to day management of companies and issuers.

Loss of investment value following a sustainability risk may occur in numerous ways. For investments in a corporate issuer, losses may result from damage to its reputation with a consequential fall in demand for its products or services, loss of key personnel, exclusion from potential business opportunities, increased costs of doing business and/or increased cost of capital. Laws, regulations and industry norms play a significant role in controlling the impact of sustainability factors on many industries, particularly in respect of environmental and social factors. Any changes in such measures, such as increasingly stringent environmental or health and safety laws, can have a material impact on the operations, costs and profitability of businesses. A corporate may also suffer the impact of fines and other regulatory sanctions. The time and resources of the corporate’s management team may be diverted from furthering its business and be absorbed seeking to deal with the sustainability risk, including changes to business practices and dealing with investigations and litigation. Sustainability risks may

also give rise to loss of assets and/or physical loss including damage to real estate and infrastructure. The utility and value of assets held by businesses to which the Fund is exposed may also be adversely impacted by a sustainability risk. Further, certain industries face considerable scrutiny from regulatory authorities, non-governmental organisations and special interest groups in respect of their impact on sustainability, which may cause affected industries to make material changes to their business practices which can increase costs and result in a material negative impact on the profitability of businesses. Such scrutiny may also materially impact the consumer demand for a business's products and services which may result in a material loss in value of an investment linked to such businesses.

Sustainability risks are relevant as both standalone risks and as cross-cutting risks which manifest through many other risk types which are relevant to the assets of the Fund. For example, the occurrence of a sustainability risk can give rise to financial and business risk, including through a negative impact on the creditworthiness of other businesses.

Risk Factors relating to the use of SFTs and TRS

The Securities Financing Transactions Regulation

The European Parliament and Council have adopted Regulation (EU) No 2015/2365 of 25 November 2015 which was published in the Official Journal of the European Union on 23 December 2015 and took effect as of 12 January 2016 known as the Securities Financing Transactions Regulation ("SFTR"). The SFTR introduces certain requirements in respect of SFTs applying to financial counterparties, including UCITS investment companies, and certain non-financial counterparties. Such requirements include, amongst other things, the reporting of each SFT that has been concluded between such financial counterparties and non-financial counterparties, together with any modification or termination of an SFT, to a trade repository. The SFTR also introduces restrictions and disclosure requirements on the reuse of financial instruments received as collateral under a "collateral arrangement". Whilst an SFT may constitute a collateral arrangement, it is important to note that the provisions relating to the reuse of collateral are not restricted to SFTs and in fact relate to the broader collateral markets. In addition, the SFTR introduces new investor disclosure rules in periodical reports and in pre-contractual documents in respect of the use of SFTs and TRSs. The Investment Manager needs to ensure compliance with these requirements.

Prospective investors should be aware that the regulatory changes arising from the SFTR may in due course significantly raise the costs of entering into SFTs and TRSs, and may adversely affect the Fund's ability to engage in such transactions. This could adversely affect the performance of the Fund and the value of Shares of any Class as a result.

Counterparty Risk and SFTs

Where the Fund enters into a repurchase transaction, it is exposed to the risk that its counterparty will default. Where the Fund is acting as buyer under a repurchase transaction, and the Fund has provided collateral that exceeds the value of the relevant securities being purchased, then the Fund is exposed to the risk that its counterparty will default and not return the value of such excess.

Counterparties may also be subject to action by resolution authorities. Any resolution action taken in respect of a counterparty may adversely affect the Fund. For example, amongst other things, the Fund's claims against the counterparty may potentially be mandatorily transferred to a different entity or the Fund's claims may be reduced (in part or in full) or converted into equity.

Upon an insolvency of its counterparty the Fund is also exposed to the legal risk that, depending on the insolvency rules of the relevant jurisdiction, it is not possible to set-off or net the value of the obligations to redeliver or repurchase the relevant securities against the value of the collateral. This would significantly increase the losses of the Fund.

In each case set out above, the use of SFTs may result in the Fund and its Shareholders suffering losses.

Counterparty Risk and TRS

Investing in a TRS gives rise to different risks compared with directly investing in the relevant underlying asset. In particular, the Fund will have no ownership interest in the underlying security or asset and the only recourse will be against the counterparty to the relevant TRS. Accordingly, the Fund is exposed to the credit risk of its counterparties and investors may suffer losses upon the default of a counterparty, particularly where any collateral that is received is realised at a lower value than expected and is not sufficient to cover the exposure

of the Fund to the counterparty. To the extent that a Fund makes a large up-front payment on commencement of the TRS, the counterparty risk taken by that Fund may be significantly increased.

Chains of SFTs

A party to an SFT will typically acquire a contractual right against its counterparty enabling it to require redelivery of equivalent assets at conclusion of the relevant SFT. However, the counterparty is not obliged to retain the relevant assets during the life of the SFT and may enter into further SFTs with other parties in respect of the same assets resulting in it giving up title to the relevant assets. In such circumstances, a default of a party with whom the counterparty is transacting may impact on the ability of the counterparty to perform under the SFT with the Fund. For example, it may not be able to readily source the relevant asset from elsewhere or its own ability to perform may be materially impacted by the defaults of other parties to SFTs. The Fund may also enter into further SFTs and be exposed to such risks.

Alternatively, the counterparty or the Fund may simply sell the relevant assets outright and be unable to readily re-acquire equivalent assets in the market for the purpose of satisfying its redelivery obligations which may result in a default and the Fund incurring losses.

Reuse

Where financial instruments are transferred under a title transfer collateral arrangement or if a right of use is exercised in relation to any financial instruments that the Fund has provided by way of collateral under an agreement containing a right of use, the Fund will be exposed to certain risks. In particular, the Fund's rights, including any proprietary rights that it may have had, in those financial instruments will be replaced by an unsecured contractual claim for delivery of equivalent financial instruments subject to the terms of the relevant agreement. Those financial instruments will not be held by the relevant counterparty in accordance with client asset rules, and, no client asset protection rights will apply (for example, the financial instruments will not be segregated from other counterparty assets and will not be held subject to a trust).

In the event of the counterparty insolvency or default under the relevant agreement the Fund's claim for delivery of equivalent financial instruments will not be secured and will be subject to the terms of the relevant agreement and applicable law and, accordingly, the Fund may not receive such equivalent financial instruments or recover the full value of the financial instruments.

Collateral Management Risk

In seeking to reduce credit risk through the posting or receiving of collateral in OTC derivatives and efficient portfolio management techniques, the management of the collateral posted/received will be subject to liquidity and counterparty risks associated with the relevant collateral instruments. Collateral is also subject to other types of risks as set out below:

- a) Operational risks: including that the valuation of the underlying instrument for which such collateral is posted is inaccurate due to inadequate or failed internal processes, people or systems which may cause the Fund to have an incorrect level of margin posted or received.
- b) Legal risks: including risks associated with contracts and change of regulations in the relevant jurisdiction, as well as the risk that collateral provided in cross-border transactions could result in conflicts of law preventing the Fund from recovering collateral posted or from enforcing its rights in relation to collateral received.
- c) Custody risk: collateral received by the Fund on a title transfer basis will be held by the Depositary or by a third party depositary subject to prudential regulation and will be subject to custody risks associated with those entities. Collateral pledged by the Fund will continue to be held by the Depositary.
- d) Reinvestment of Cash Collateral: cash collateral that is reinvested may realise a loss, which would reduce the value of the collateral and result in the Fund being less protected if there is a counterparty default.

While commercially reasonable efforts are used to ensure that collateral management is effective, such risks cannot be eliminated.

Annex II

SECURITIES FINANCING TRANSACTIONS REGULATION

The SFTR introduces certain requirements in respect of SFTs and TRSs applying to financial counterparties, including UCITS investment companies, and non-financial counterparties. Such requirements include, among other things, pre-investment disclosure of certain information (as set out below) to potential investors in the Fund.

Investment Strategy and Associated risks

The Fund may invest in those securities (and enter into certain financial transactions relating to such securities) described in this Supplement, including (for the purposes of the SFTR), certain SFTs and TRSs. Such transactions expose such Funds to different operational, liquidity, counterparty and legal risks, as described below and at Annex I (**Additional Risk Factors**) above.

Securities Financing Transactions

Repurchase transactions

The Fund may enter into repurchase transactions in respect of the various securities and asset classes described in the section entitled **Investment Policy** above, subject to the conditions and limits set out in the UCITS Regulations, under which one party will sell securities to the other party and agree to repurchase equivalent securities in the future, at a price including a market rate of interest for borrowing (a repurchase transaction seen from the point of view of the party buying the securities is known as a reverse repurchase transaction). Repurchase transactions will be entered into for efficient portfolio management purposes that provide funding for the party selling the relevant assets and generate a return for the other party.

The parties will also exchange margin by reference to the market value of the securities and the relevant repurchase obligations.

The Fund will not enter into reverse repurchase transactions.

SFTs and the impact on the Fund's proprietary rights

Under the SFTs described above, the Fund's proprietary rights in the relevant securities it sells or lends, or when acting as purchaser or borrower, the collateral it transfers to its counterparty(s) is replaced by an unsecured contractual claim for redelivery of equivalent assets. The Fund retains no direct rights in relation to the asset that has been sold or lent (or collateral that it has transferred).

Total Return Swaps

The Fund may enter into TRSs as described more fully in the section entitled **Financial Derivative Instruments and Techniques** in the Supplement above.

Counterparty Selection

The Investment Manager will conduct appropriate due diligence in the selection of counterparties. Such counterparties will be credit institutions authorised in the EEA or a signatory state to the Basel Capital Convergence Agreement of July 1988 or a credit institution in a third country deemed equivalent pursuant to Article 107(4) of the Regulation (EU) No 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No 648/2012, an investment firm authorised in accordance with MiFID or a group company of an entity approved as a bank holding company by the Federal Reserve of the United States of America where that group company is subject to bank holding company consolidated supervision by the Federal Reserve. In addition, such counterparties will be subject to a credit rating by an agency registered and supervised by the European Securities and Markets Authority and that rating shall be taken into account in the credit assessment process

and if downgraded to A-2 or below (or comparable rating) by the credit rating agency, will be subject to a new credit assessment.

The Fund will adhere to the UCITS Regulations and any other relevant requirements of the Central Bank (to the extent applicable) in relation to cases where rated counterparties are subject to a ratings downgrade. Due regard will be given to a number of risk and reputational factors including legal status, regulatory supervision and jurisdiction and/or country of origin, management, capital adequacy and solvency ratios, historical financial performance, credit ratings, parent company standing, market-implied probability of default derived by monitoring the counterparty's corporate debt securities, credit default swaps referencing the counterparty and its corporate debt securities, and the stock price of the counterparty.

Acceptable Collateral

Acceptable collateral for the Fund to receive in connection with SFTs and TRS is normally as follows:

- (i) Repurchase transactions: the Fund will only receive cash in exchange for any security subject to a repurchase transaction. Variation margin owed to the Fund will be received in the form of cash.
- (ii) TRS: variation margin owed to the Fund will be received in the form of cash.

In certain exceptional circumstances for repurchase transactions and TRS, acceptable collateral may be in the form of securities, provided those securities are permitted by the Fund's investment strategy and the Company's Collateral Policy (as further detailed in the Prospectus).

Collateral Valuation

The mark-to-market value of the SFTs and/or TRS entered into by the Fund (including any collateral in relation to such arrangements) will be valued daily in accordance with the terms of the relevant agreement and the Fund will require the delivery of variation margin to cover its exposure to its counterparty over certain thresholds.

There can be no guarantee that an investment in the Fund will ultimately be realised at any such future valuation. Because of overall size, concentration in particular markets and/or counterparties and maturities of positions held by the Fund, the value at which its investments can be liquidated may differ, sometimes significantly, from the interim valuations. In addition, the timing of liquidations may also affect the values obtained on liquidation. At times, third party pricing information may not be available for certain positions held by the Fund. Valuations of the Fund's securities and other investments may involve uncertainties and subjective judgmental determinations and if such valuations should prove to be incorrect, the Net Asset Value of the Fund could be adversely affected.

Return, costs and fees relating to SFTs and TRS

The Company shall ensure that all the revenues arising from SFTs and any efficient portfolio management techniques shall be returned to the Fund following the deduction of any direct and indirect operational costs and fees arising. Such direct and indirect operational costs and fees will include fees and expenses payable to SFT and/or TRS counterparties engaged by the Investment Manager on behalf of the Fund from time to time. Such fees and expenses of any counterparties engaged by the Investment Manager on behalf of the Fund, which will be at normal commercial rates together with VAT, if any, thereon, will be borne by the Fund. Details of the Fund's revenues arising and attendant direct and indirect operational costs and fees, the identity of those SFT and/or TRS counterparties most frequently engaged by the Investment Manager on behalf of the Fund and the expected impact of efficient portfolio management techniques on the performance of the Fund shall be included in the Fund's annual report.

Safe-keeping of Fund assets

The Depositary is responsible for the safe-keeping of the Fund's assets, including collateral received by the Fund. Information on the arrangements entered into with the Depositary is set out in this Prospectus under the section entitled **Depositary**.

Purpose of, and Exposure to, SFTs and TRSs

Transaction Type	Purpose of Transaction	Type of assets that can be subject to such Transaction	Expected proportion of NAV subject to such transactions	Max proportion of NAV subject to such transactions
Total return swaps	Typically used for efficient portfolio management purposes in order to achieve efficient financing on underlying securities or used to access markets and products which are otherwise unavailable and manage leverage to assist in achieving the Fund's investment objective	Bonds issued by corporate and financial issuers, government bonds, convertible bonds, bond total return indices, loan total return indices	0 – 30 per cent.	40 per cent.
Repurchase Transactions	Used for efficient portfolio management purposes in order to raise funds for re-investment or to increase cash reserves and manage leverage to assist in achieving the Fund's investment objective	Bonds issued by corporate and financial issuers, convertible bonds, asset-backed securities, and government bonds	0 – 10 per cent.	20 per cent.

The Investment Manager will report to the Shareholders of the Company the amount of assets engaged in each type of TRS, as well as such other information on the use of TRS as is required under the SFTR, as part of its annual report.

ANNEX

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: CQS Dynamic Credit Multi Asset Fund
Legal entity identifier: 254900I4NBB1K6OVQG81

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: ___%	<input type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

The Fund seeks to promote certain environmental and social characteristics, which consist of environmental good practice and the reduction of greenhouse gas emissions, pro-social and ethical practices and industries, and limiting the use of controversial weapons. This is achieved through:

- (i) excluding investments in certain industries perceived as harmful to environmental and/or social objectives;
- (ii) investing in issuers which demonstrate positive environmental, social, and/or governance (“**ESG**”) characteristics and/or deliver sustainable outcomes by achieving positive ESG ratings. Sustainable outcomes may include, for example, investments in convertible bonds where the proceeds of the debt is hypothecated for

a specific use by the company to achieve positive environmental outcomes, such as investment in clean energy infrastructure;

- (iii) maintaining a low carbon intensity rating; and
- (iv) managing the Fund to achieve a portfolio with net zero CO2 emissions by 2050 or sooner (net zero is defined as the total emissions of CO2 being equal to or less than the volume of CO2 either offset or re-absorbed).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used by the Fund include:

- violations of any of the Ten Principles of the UN Global Compact;
- operational business involved in the production of controversial weapons, including cluster munitions, landmines, incendiary weapons (including white phosphorus), blinding laser weapons, non-detectable fragments, depleted uranium weapons, and/or nuclear and biological/chemical weapons;
- operational business that derives greater than 10 per cent. of revenue from direct involvement in the following activities:
 - a. tobacco sales;
 - b. adult entertainment; and/or
 - c. payday lending;
- operational business that derives greater than 5 per cent. of revenue from direct involvement in thermal coal and/or oil sands;
- ESG ratings;
- Weighted Average Carbon Intensity metrics; and
- issuer net zero alignment.

Further detail on these sustainability indicators is set out below.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

Not applicable – the Fund will not make sustainable investments.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable – the Fund will not make sustainable investments.

--- ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Not applicable - the Fund currently does not consider principal adverse impacts on sustainability factors.

--- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable – the Fund will not make sustainable investments

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes

No. Consideration of Principal Adverse Impact (“PAI”) indicators, as defined in Annex I of EU Commission Delegated Regulation 2022/1288, is not part of the strategy of this Fund.

What investment strategy does this financial product follow?

The investment strategy of the Fund is set out under the heading “**Investment Objective and Policy**” in the Fund’s Supplement, above. The Investment Manager applies binding restrictions and investment criteria, which may not be disapplied or overridden by the Investment Manager, in order to ensure the Fund complies with its commitment to promote the relevant environmental and social characteristics. These restrictions and criteria are set out in further detail below.

Integration of sustainability risks in investment decision making

A sustainability risk in the context of the Fund is an environmental, social, or governance event or condition that, if it occurs, could cause an actual or potential material negative impact on the value of an investment. The particular sustainability risks which apply to the Fund are included in the “**Risk Factors**” section of the Prospectus.

The extent to which sustainability risks represent potential or actual risks to the Fund is considered by the Investment Manager in its investment decision making and risk monitoring. Along with any

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

other material risks, the Investment Manager will consider sustainability risks in order to seek to maximise returns for the Fund over the long-term and lead ultimately to better investment outcomes.

The Investment Manager recognises that environmental, social, and governance factors, including exposure to sustainability risk, are integral to the analysis of individual issuers. The factors considered by the Investment Manager will vary depending on the security in question, but typically include the themes addressed by the sustainability risks as set out in the “**Risk Factors**” section of the Prospectus. The Investment Manager conducts periodic monitoring of existing investments and may determine that certain investments are no longer appropriate for the Fund and accordingly may disinvest or decide not to invest in such assets.

In the event that a sustainability risk arises, the Investment Manager may determine that certain assets are no longer appropriate for the Fund and accordingly may disinvest or decide not to invest in such assets. The Investment Manager may determine specific parameters for which it expects to invest relating to sustainability factors, including but not limited to, the breakdown of ESG ratings and carbon intensity statistics relating to the portfolio.

As an active investor, the Investment Manager may also engage, if deemed appropriate, on behalf of the Fund with issuers (either directly or collaboratively) to encourage them to recognise, and potentially change their sustainability actions to engender long-term industry improvement.

Sustainability Impact Assessments

As part of the analysis of ESG factors and any consequent sustainability considerations, the Investment Manager may consider in particular the sustainability risks detailed in the “**Risk Factors**” section of the Prospectus on the performance of the Fund and the outcomes expected of the Fund’s Shareholders.

Assessment of sustainability risks is complex and relies on subjective judgements, which may be based on data that is limited, estimated, or outdated. As this is an evolving process, even when identified, it cannot be guaranteed that the Investment Manager’s assessment of the impact of sustainability risks on the performance of the Fund is accurate or complete.

The impacts following the occurrence of a sustainability risk may be numerous and will vary depending on the specific risk, region, and asset class. Generally, where a sustainability risk occurs in respect of an asset, there could be a negative impact on, or entire loss of, the value of such asset. Any sustainability risk can either represent a risk on its own or have an impact on other risks and contribute significantly to other risks, such as market risks, operational risks, liquidity risks, or counterparty risks.

Please see sections headed “**Investment Objective**” and “**Investment Policy**” for further detail on the Fund’s investment strategy.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

In order to meet the environmental and social characteristics promoted by the Fund as set out above, the Investment Manager will exclude direct investment in issuers which:

- (i) are involved in the production of controversial weapons, including cluster munitions, landmines, incendiary weapons (including white phosphorus), blinding laser weapons, non-detectable fragments, depleted uranium weapons, and/or nuclear and biological/chemical weapons;
- (ii) derive greater than 10 per cent. of their revenue from direct involvement in tobacco sales, adult entertainment, or payday lending; or
- (iii) derive greater than 5 per cent. of their revenue from direct involvement in thermal coal and/or oil sands.

The Investment Manager will not invest in companies that, to the best of its knowledge, are linked to and/or engage in activities that involve forced labour, child labour, modern slavery, human

trafficking, or other labour practices, in each case as prohibited under US, UK, and/or EU laws or deemed to be breaches of the Ten Principles of the UN Global Compact.

The Investment Manager will use third party data screens to apply the exclusions set out above. Any issuers not covered by such third party data will be assessed as part of the Investment Manager's integrated responsible investment approach.

Notwithstanding the foregoing, the Fund may invest in issuers which would otherwise be prohibited under the above exclusions via sustainability-linked bonds, 'social' bonds, 'green' bonds, 'blue' bonds, and/or 'brown' (or 'transition') bonds, provided such bonds adhere to either the International Capital Market Association Green Bond Principles and/or any similar framework or guidelines published by a recognised industry body. Such bonds are issued by companies where corporate targets and/or the use of proceeds is directly linked to, or used for, sustainable activity by the company.

For the purposes of monitoring the above exclusions, direct investment shall not include exposure of the Fund to the underlying constituents of an index or underlying exposures in ABS transactions, or other similar investments in which the Investment Manager is unable to exercise discretion over the selection of underlying assets or exposures.

The Investment Manager will focus investment by the Fund in issuers which demonstrate positive ESG characteristics based on their ESG rating, as well as adaptability and resilience in the transition to a low carbon economy. In particular, the Investment Manager will:

- (i) invest no more than 20 per cent. of the Fund's total Net Asset Value in issuers with an ESG rating of B or lower. ESG ratings are attributed to issuers using either third party or internal ESG ratings assessed by the Investment Manager. The ratings range from AAA-CCC and are based on factors such as climate change, toxic emissions and waste, labour management, health and safety, privacy and data security, corporate governance and behaviour, and remuneration;
- (ii) achieve a Weighted Average Carbon Intensity in respect of the Fund's portfolio which is at all times lower than the ICE BoA Developed Markets High Yield Index. The Weighted Average Carbon Intensity rating is generated following the Investment Manager's review of greenhouse gas emissions disclosures from each issuer or, in the case of an issuer that does not make such disclosure, applying the industry average and assessing these disclosures using third party calculation methodology; and
- (iii) commit to achieving a portfolio for the Fund with net zero CO2 emissions by no later than 31 December 2049 or such earlier date as may be determined by the Directors by:
 - a. reviewing portfolio companies to capture current net-zero alignment;
 - b. reviewing portfolio targets to establish a trajectory towards a net-zero portfolio;
 - c. directly engaging with issuers where necessary to encourage net-zero alignment; and
 - d. taking prompt action to reduce or remove exposure to issuers that fail to adapt or manage climate risk;
- (iv) commit to a 50 per cent. reduction in the Fund portfolio's scope 1 and 2 Weighted Average Carbon Intensity by 2030 as measured against the portfolio's scope 1 and 2 Weighted Average Carbon Intensity as at 28 February 2021; and
- (v) commit to 70 per cent. of financed emissions in the Fund's portfolio to be either net-zero, net-zero aligned or subject to direct or collective engagement and stewardship actions by 2025.

In addition to the above, the Investment Manager seeks to engage on an ongoing basis with relevant issuers to drive long-term ESG improvement.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

There is no committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.

Good governance practices include sound management structure, employee relations, remuneration of staff and tax compliance.

● **What is the policy to assess good governance practices of the investee companies?**

The companies in which investments are made follow good governance practices.

In accordance with the requirements set out in the SFDR, the Investment Manager will assess the good governance practices of any issuer prior to investing (and on a periodic basis thereafter), considering in particular, but without limitation, the implementation of sound management structures, employee relations, remuneration of staff, tax compliance, shareholder structure, board composition, independence of the board, and diversity.

The Investment Manager is a signatory to the UN Principles for Responsible Investment and, as such, is committed to each of the six principles, including the incorporation of ESG issues into investment analysis and decision-making processes. A copy of the Investment Manager's Responsible Investment Policy can be found on the Investment Manager's website (as detailed below).

What is the asset allocation planned for this financial product?

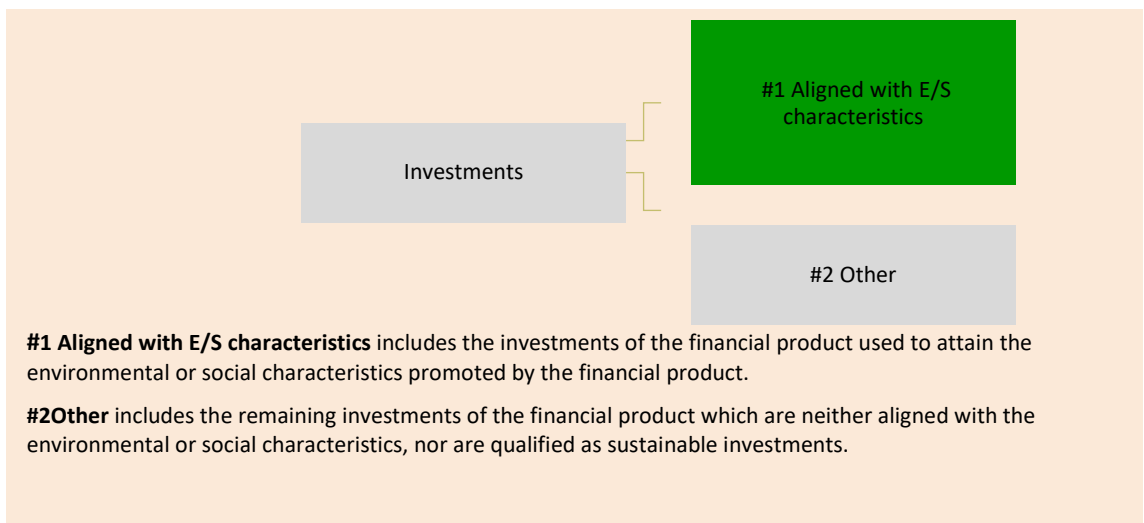

It is typically expected that at least 65 per cent. of the Fund's assets are aligned with the environmental and social characteristics promoted by the Fund (#Aligned with E/S characteristics), which do not qualify as sustainable investments. It is typically expected that up to 35 per cent. of the investments of the Fund are not aligned with these characteristics (#2 Other)

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Fund may use derivatives for investment purposes, efficient portfolio management and for hedging. Derivatives will not be used for attaining the environmental or social characteristics.

investee companies.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

0%. The Fund has no minimum share of sustainable investments with an environmental objective that are aligned with the EU Taxonomy Regulation.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes: In fossil gas In nuclear energy

No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **What is the minimum share of investments in transitional and enabling activities?**

0% - there is no minimum share of investments in transitional and enabling activities.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Not applicable - there is no minimum share of sustainable investments.

What is the minimum share of socially sustainable investments?

Not applicable— there is no minimum share of socially sustainable investments.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Those investments included under “#2 Other”, may include ABS, derivatives, money market instruments (including commercial paper, floating rate notes or certificates of deposit) for ancillary liquidity purposes. There are no minimum environmental or social safeguards.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The Fund has not designated a reference benchmark for the purposes of attaining the environmental characteristics which the Fund seeks to promote.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***
Not applicable.
- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***
Not applicable.
- ***How does the designated index differ from a relevant broad market index?***
Not applicable.
- ***Where can the methodology used for the calculation of the designated index be found?***
Not applicable.

Where can I find more product specific information online?
