ESG Rating Breakdown^{5,9}

There is no guarantee that the Fund will invest in this way at all or do so in the same manner as set forth in this factsheet. Figures may not sum to 100 due to rounding. The value of securities may go down as well as up, depending on the performance of companies and general market conditions. The value at which securities in certain companies can be liquidated may differ, sometimes significantly, from the interim valuations. Investment in securities of certain companies may be less liquid, more volatile and subject to greater risks than securities of other companies. Investment in emerging markets may increase the volatility of the Fund's Net Asset Value, and accordingly, an investment in the Fund's Shares may be worth more or less on redemption than their original purchase value. As the Fund may invest in derivatives, such as swaps, it may lose more than the amount invested in such derivatives. Investors in shares denominated in a currency other than the base currency of the Fund may be affected by changes in currency movements. For full details of the relevant risks reference should be made to the risk factors sections of the Prospectus and Supplement.

The Fund was incorporated in Ireland on 27 November 2007 as an investment company with variable capital with limited liability under registration number 449784. The Fund is authorised by the Central Bank as a UCITS pursuant to the UCITS Regulations.

Overall Fund data source: CQS and BNP Paribas Fund Administration Services (Ireland) Limited as at the last business day of the month indicated at the top of page 1.

1Excludes investments in Futures and Interest Rate Swaps.

2Excludes positions with zero market value.

3Total Portfolio Yield to Maturity is the total unannualised unrealised yield the Fund will achieve when the positions are held to maturity and is calculated as: Yield to Maturity x Time to Maturity x %NAV. Distressed positions are excluded. Positions with YTM >20%, will be capped at 20%.

4Weighted Average Carbon Intensity ("WACI") is estimated using scope 1 & 2 available disclosures or proxy estimates based on comparative data from MSCI. For proxy estimates, we apply a waterfall approach which requires a minimum of 10 issuers within the proxy estimate group. If there are not 10 issuers in the proxy estimate group, it changes to a broader category group to increase the number of comparable issuers and continues moving to a broader group until a minimum group size of 10 issuers are obtained or 'sector' level is reached. The order is sub-industry first, then industry, then industry group, then finally sector. Where MSCI data is stale or the proxy estimate is not an appropriate reflection of the issuer, we may implement a carbon emission override to report an issuer's most recent publicly available carbon data or use a more appropriate comparator (using MSCI data) as a proxy estimate. Please note that the WACI score does not include hedges for efficient portfolio management purposes.

5ESG ratings are attributed to issuers using either third party or internal ESG ratings assessed by CQS. The ratings range from AAA-CCC and are based on factors such as climate change, toxic emissions and waste, labour management, health and safety, privacy and data security, corporate governance and behaviour, and remuneration. A waterfall approach is used when assessing the ESG rating portfolio distribution and average rating of the portfolio, whereby (i) if a third party ESG rating is available that rating is used, failing which (ii) CQS' rating will be used. ESG ratings may reflect the subjective opinions of CQS or the relevant third party and may be based on qualitative as well as quantitative data. ESG ratings may be based on unverified third party sources or unaudited financial and non-financial data. ESG ratings are not an opinion of the creditworthiness of any issuer. ESG Rating Analysis: MSCI ESG Research LLC. Please see MSCI Disclaimer at the end of this report.

6Returns are represented by the Salar Strategy Index USD: since inception 30 November 2005 to 10 February 2008, returns are the Salar Fund A USD share class; 11 February 2008 to the present date, returns are the CQS Fund (UCITS) A1 USD share class. Since 11 February 2008, the Strategy has followed the Undertakings for Collective Investment in Transferable Securities Directive (UCITS). The investment process and team have remained substantially the same for the life of the Strategy. Returns are net of fees, expenses and transaction costs. Investors should refer to each specific share class for the actual historical performance of the relevant class. The value of investments can go down as well as up.

7The Fund may have since exited some or all of the positions detailed in this commentary. Includes data sourced from Bloomberg.

8Credit Rating: Positions, including Cash, are weighted according to market value and internal credit ratings are used where externally sourced credit ratings are not available. Cash is rated according to the rating of the custodian bank.

9ESG ratings may not sum to 100% due to rounding.
